

Final Report

Objectives

Describe the activities that were expected to take place as result of this grant, along with a note on whether or not they occurred. Objectives are listed in the grant award letter. Please refer to these objectives in your response.

Discrepancies & Pivots

If you had a grant pivot approved, or if any new discrepancies have occurred, make note of what has changed.

Participants Served

For our data collection purposes, we need all participant data to be submitted relevant to year served. If your programming took place within one calendar year, you are only required to fill out the Participants - Year 1 information. If your programming took place over multiple calendar years, break out your results by calendar year and fill in one Participants - Year # block of information for each calendar year. The data collection date should be the last date within a calendar year that data was collected. For multi-year programs, all but the final year may have a data collection date of December 31. If you have questions about how to input your data, contact Sarah Shaw at sshaw@bdmorganfdn.org.
