

Provider & Product Vetting Process (Revised 2025)

Entrepreneurship Education: Providing opportunities that develop the mindset, agency, and skills to design and actualize enterprising ideas and solutions.

Overview

To ensure a high-quality and inclusive experience on YIPPEE Exchange, all providers and their products undergo a structured vetting process. This revised model reflects our latest programmatic updates, including testing of new products against a [rubric](#) and community-driven quality review through the YIPPEE Voices program.

New Providers

New providers must:

- Watch onboarding videos to understand expectations.
- Complete a short application describing alignment with entrepreneurship education, product quality assurance, and testimonials.
- Undergo a safety, inclusion, and skill alignment review.
- Participate in an onboarding call with the YIPPEE team.
- Submit at least one product for testing and initial storefront setup.

YIPPEE Product Testing Guidelines (All Providers)

All new products submitted to YIPPEE are tested on a rolling basis throughout the year to ensure quality and alignment with our mission.

- All products are reviewed by the YIPPEE team to ensure they align with our definition of entrepreneurship education and meet platform expectations.
- In-Person Products (e.g., guest speakers, field trips)
 - May receive conditional approval and be published on the platform.
 - May receive final approval once the product is tested by a YIPPEE Voices educator.
- Approval decisions are typically issued within two weeks of testing.

Platform Quality Review

YIPPEE Voices

To ensure ongoing quality, educators in the YIPPEE Voices program will:

- Test and provide feedback on resources already available on the platform
- Help identify delivery improvements and implementation challenges
- Build community and champion high-impact resources

Educators in the YIPPEE Voices program receive exclusive perks and are supported by a dedicated sponsorship fund, allowing them to test resources without using their own points.

Ongoing Internal Monitoring

YIPPEE continually monitors resource quality through:

- Educator reviews and impact surveys
- Site visits
- Monthly usage and performance audits

Resources that no longer meet standards may be revised or removed.

Timeline Summary

- New provider onboarding: flexible, provider-paced
- New product testing: rolling basis for products shared on the platform or sent directly to the YIPPEE team
- Decision notification: Within two weeks after product review submission

The YIPPEE team provides feedback, support, and guidance throughout the process, and is available for questions during testing. Contact us at support@yippee.exchange.
